Hi Kate and Calvin,

It looks like we should be able to deliver the AoR modeling report the week after Labor Day.

We are also making good progress on our evaluation of the testing and monitoring strategy, and I hope to deliver that very soon after. (I would like Mary Ellen to review certain parts of it with the modeling evaluation fresh in her head, if her family life remains under control.)

I think Jim is working on the well construction and plugging pieces this week (when Florence Copper doesn't interrupt). If that goes as planned, we can deliver it in the next couple of weeks as well.

Then, that just leaves a few smaller reviews: of the E&RR Plan and proposed operations that we should be able to deliver by mid-September at the latest.

Please let me know if you have any questions.

Subject: RE: [EXT] FW: Draft geologic evaluation: CES Mendota site

Thanks for your understanding.

I asked her to try to give me an update early next week (based on how the evaluation and life are going).

Hi Shari.

Thanks for the update and I am sorry to hear about Mary Ellen. Yes, we can push the deliver due date for the modeling evaluation report. Getting the FR evaluation sooner works for us.

When you have a better idea of when you can submit the modeling evaluation report, please let us know.

Thanks. Kate

Kate Rao

Thanks Calvin

I wanted to check in with you both on the schedule for the CES evaluation. Mary Ellen is back in the office today, but her schedule is a bit unclear. (She's dealing with a family emergency that kept her out all of last week and expects that things will remain unpredictable for a while.)

I was wondering if it would be OK to delay delivering the modeling evaluation report (which we planned to deliver next week). We can provide an update later this week about when we might be able to deliver it. In exchange, we have made some good progress on the financial responsibility evaluation, and I could work to accelerate it and deliver it this week. (FR is a complex issue and will likely involve some discussions about how to handle next steps, so we could get moving on it.)

Note that the other pieces are proceeding and, while we would like retain some of the sequencing related to the modeling evaluation (especially the testing and monitoring reviews), we will work to deliver what we can even if it leaves some placeholders to be addressed after the modeling evaluation is complete.

Please let me know if you would like to discuss the schedule, and thanks for your understanding.

Attached is the updated geologic evaluation report. We added text and/or provided responses to address each of the comments in the document. We also added a question about the applicant's interpretation of VCL log values as requested by the Water Board on Monday's call.

Please let me know if you need anything else.

Thanks, Calvin

Pulling Kate in as I assume you'd like us to update the review to address HQ comments and add questions from yesterday.

We can try to take care of this by the end of the week if that's ok.

Hi Calvin,

Thank you for allowing us the opportunity to review this material. Attached are a handful of comments/questions for your consideration. Please let us know if you have any questions or would like to discuss.

Thanks,
Molly

Hi Molly,

Cadmus provided the attached draft geologic site characterization evaluation report for the CES-Mendota Class VI permit application. Please let us know if HQ has any feedback on the evaluation.

Cadmus will provide an evaluation of the AoR delineation modeling next in late August.

Thanks,
Calvin
